

COMPACTORS

5030

The classic bagging compactor that can reduce waste volumes in bags by up to 10:1. Easy to locate even in limited spaces. A compacted and well sealed bag prevents leakage and odors. Critical parts made from stainless steel. Wheeled - for easy cleaning.

5031

A combination of both bagging and baling; The unit is capable of compacting waste into bags or making small bales of cardboard, paper sacks, plastic film, etc. Bales can also be contained in bags.

TOM 1040

The conventional looking waste bin that compacts up to 7:1. Built-in sensor allows shutter door to automatically open for hands-free operation. Easy to read status indicator bar provides operational status. Low maintenance, easy to wrap, and quiet operation.

BALERS

3110

Compact and effective front-loading baler for versatile application. It takes up only 6 sq. ft. of your floor space and has a ceiling clearance of 6'7". Bale weights up to 110 lbs cardboard - 155 lbs plastic.

3115

Easy, front loading operation, great for plastic foil, shrink film, plastic bags, cardboard, etc. Adjustable bale size with cross-binding up to 132 lbs cardboard - 190 lbs plastic.

5010-E

A top-loading baler for recyclables such as cardboard, paper, plastic, fabrics, etc. Bale weights up to 110 lbs cardboard - 200 lbs plastic. Wheels are available on option.

3210

For operations needing higher capacity than most balers in its size can offer. Floor space less than 9 sq. ft. and a cycle time of only 13 seconds! With its power, the 3210 takes care of medium volumes of cardboard and plastics in no time! Bale weights up to 180 lbs cardboard - 245 lbs plastic.

3320, 3325

The new POWER balers are stronger, faster and smarter! These models are mid-size front loading balers with low height (3320 only 6'6") for easy installation and no reassembly needed. 3320 and 3325 come with swing door. Bale weights from 440-770 lbs depending on material.

3420, 3620, 3820

The new POWER balers are stronger, faster, smarter and low-profile, with 6'6" transport height and 8'6" operation height, which allows for upright delivery through doorway. Automatic shutter, autostart, safe and easy to tie baling system. Capable of making 900-1100 lbs cardboard bales.

MULTI CHAMBER BALERS

5070

Top loading baler that can be extended to form a multi-chamber system for sorting and baling recyclables such as cardboard and plastic film. Single phase installation, easy operation and bale dolly included for simple handling of bales that weigh 110 lbs - cardboard and up to 180 lbs - plastic.

5070-HDC

Top-loading, multi-chamber and expandable, the 5070-HDC is the heavy-duty version of the standard 5070. With 22,000 lbs of ram force, the 5070-HDC can handle tougher PET bottles, jugs, cans and light wood packaging in addition to cardboard and plastic film. Bales can be secured with 2-6 straps, incl. one cross strap. Cardboard bales will weigh up to 190 lbs and plastic will weigh up to 220 lbs.

9020

Our real heavy weight. The multi-bin baler has a capacity that well exceeds our 5070 models. An expandable system for companies with large amounts of packaging materials, recyclables, etc. Compacting bales up to 440 lbs - cardboard and up to 660 lbs - plastic. Simple and easily expanded with extra chambers when your needs increase.

SPECIALTY PRODUCTS

5030-N HD

Crushes hazardous waste such as glass jars and cans/tins and rags containing residual liquid chemicals inside 55 gallon drums to facilitate their disposal.

5030-BMT

The 5030 Marine Version (BMT) is the perfect trash management equipment for installation on a ship or off-shore platform. The 5030-BMT accommodates for rough seas by having both a locking device for the power head in its rear position as well as skids for the machine to be secured on deck. In addition, a variety of stainless steel and epoxy paint upgrades are available as pictured.

BRICKMAN

A range of briquette presses that achieve a volume reduction of up to 20:1. All you have to do is feed the machine with waste material such as cardboard, shredded paper, PET bottles and aluminum cans and press the start button. Available "liquid" option for crushing full beverage containers. Can be fed manually, by hopper or conveyor belt.

3210-DC

This dual-function baler/drum crusher is great for operations in need of crushing drums with a 5:1 ratio and baling recyclables. Same capacity as the standard 3210 baler.

Our business is helping organizations implement affordable, practical waste reduction solutions that are as good for the environment as they are for the bottom line.
